

TrueType

```
classDiagram
    class TrueType
    class ros_message_traits["ros::message_traits"]
    ros_message_traits --|> TrueType
```

The diagram illustrates a class hierarchy. At the bottom is a grey-shaded box representing the base class, `ros::message_traits`. It contains the text `ros::message_traits`, `::IsMessage< ::jaco`, `_msgs::JointVelocity`, and `_< ContainerAllocator > >`. Above this box is a white box representing the derived class, `TrueType`. A blue arrow with an open triangular head points from the top of the `ros::message_traits` box to the bottom of the `TrueType` box, indicating inheritance.

ros::message_traits
::IsMessage< ::jaco
_msgs::JointVelocity
_< ContainerAllocator > >
