

FalseType

```
classDiagram
    class FalseType {
    }
    class SpecializedClass {
        ros::message_traits::IsFixedSize< ::jaco_msgs::ArmPoseActionGoal_< ContainerAllocator > >
    }
    FalseType <|-- SpecializedClass
```

The diagram illustrates a class hierarchy. At the top is a class named 'FalseType', represented by a rectangle divided into three horizontal sections. The top section contains the text 'FalseType', while the two bottom sections are empty. Below this class is a larger, shaded rectangle representing a specialized class. This rectangle is also divided into three horizontal sections. The top section contains the text 'ros::message_traits::IsFixedSize< ::jaco_msgs::ArmPoseActionGoal_< ContainerAllocator > >', while the two bottom sections are empty. A blue arrow with a hollow triangular head points from the top edge of the specialized class rectangle up to the bottom edge of the 'FalseType' rectangle, indicating that the specialized class inherits from 'FalseType'.

ros::message_traits
::IsFixedSize< ::jaco
_msgs::ArmPoseActionGoal
_< ContainerAllocator > >
