

FalseType

```
classDiagram
    class FalseType
    class SpecializedClass["ros::message_traits<br/>::IsFixedSize< ros::jaco<br/>_msgs::ArmPoseActionFeedback<br/>_< ContainerAllocator > >"]
    SpecializedClass --|> FalseType
```

The diagram illustrates a class hierarchy. At the top is a class named 'FalseType', represented by a rectangle with two horizontal compartments. Below it is a larger, shaded rectangle representing a specialized class. A blue arrow with an open triangular head points from the specialized class up to the 'FalseType' class, indicating inheritance. The specialized class contains the following text: 'ros::message_traits', '::IsFixedSize< ros::jaco', '_msgs::ArmPoseActionFeedback', and '_< ContainerAllocator > >'. Below this text are two additional empty horizontal compartments within the shaded box.

ros::message_traits
::IsFixedSize< ros::jaco
_msgs::ArmPoseActionFeedback
_< ContainerAllocator > >
