

TrueType

```
classDiagram
    class TrueType
    class ros_message_traits["ros::message_traits"]
    ros_message_traits --|> TrueType
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box representing the base class, `ros::message_traits`. It contains the text `::IsMessage< ::jaco_msgs::ArmPoseAction_< ContainerAllocator> const >` and has two empty rectangular sections below it. Above this box is a white box representing the derived class, `TrueType`. A blue arrow with an open triangular head points from the top of the `ros::message_traits` box to the bottom of the `TrueType` box, indicating inheritance.

ros::message\_traits  
::IsMessage< ::jaco  
\_msgs::ArmPoseAction  
\_< ContainerAllocator  
> const >
