

FalseType

```
classDiagram
    class FalseType
    class Specialization["ros::message_traits::IsFixedSize< ::jaco_msgs::ArmJointAnglesActionFeedback_< ContainerAllocator > const >"]
    Specialization --|> FalseType
```

The diagram illustrates a class hierarchy. At the top is a class named 'FalseType'. Below it is a larger, shaded class representing a specialization of 'FalseType'. A blue arrow with an open triangular head points from the specialization class up to the 'FalseType' class, indicating inheritance. The specialization class contains the text: 'ros::message_traits', '::IsFixedSize< ::jaco', '_msgs::ArmJointAnglesActionFeedback', and '_< ContainerAllocator > const >'. The specialization class is divided into three horizontal sections by thin lines.

ros::message_traits
::IsFixedSize< ::jaco
_msgs::ArmJointAnglesActionFeedback
_< ContainerAllocator > const >
