

TrueType

```
graph BT; A["ros::message_traits::lsMessage< ::jaco_msgs::ArmPoseResult < ContainerAllocator > const >"] --> B[TrueType];
```

The diagram illustrates an inheritance relationship. At the bottom is a large gray box representing the base class, and at the top is a smaller white box representing the derived class. A blue arrow points from the base class box to the derived class box, indicating that the derived class inherits from the base class.
